1. **Write a query to validate login using username and password.**
   Query:
   ```
   SELECT *
   FROM users
   WHERE username = 'your_username'
     AND password = 'your_password';
   ```

2. **Fetch records created in last 7 days.**
   Query:
   ```
   SELECT *
   FROM employees
   WHERE created_at >= CURDATE() - INTERVAL 7 DAY;
   ```

3. **Find total number of records grouped by a column.**
   Query:
   ```
   SELECT department, COUNT(*) AS total_employees
   FROM employees
   GROUP BY department;
   ```

4. **Update salary based on condition.**
   Query:
   ```
   UPDATE employees
   SET salary = salary * 1.10
   WHERE department = 'IT';
   ```
