Module Name	Test Case Type	Test Case	Test Case Description	Precondition	Test Steps	Expected Result	Actual Result	Status	Priority
TV TestCases	Positive	TV__001	Verify TV powers on	Device should be available for testing	1.Perform action for Verify TV powers on 2.Observe output	System should behave correctly	System behaved correctly	Pass	High
TV TestCases	Positive	TV__002	Verify channel switching	Device should be available for testing	1.Perform action for Verify channel switching 2.Observe output	System should behave correctly	System behaved correctly	Pass	High
TV TestCases	Positive	TV__003	Verify volume control	Device should be available for testing	1.Perform action for Verify volume control 2.Observe output	System should behave correctly	System behaved correctly	Pass	High
TV TestCases	Positive	TV__004	Verify HDMI connectivity	Device should be available for testing	1.Perform action for Verify HDMI connectivity 2.Observe output	System should behave correctly	System behaved correctly	Pass	High
TV TestCases	Positive	TV__005	Verify remote response	Device should be available for testing	1.Perform action for Verify remote response 2.Observe output	System should behave correctly	System behaved correctly	Pass	High
TV TestCases	Negative	TV__006	Verify TV without power	Device should be available for testing	1.Perform action for Verify TV without power 2.Observe output	System should behave correctly	Unexpected behavior observed	Fail	Medium
TV TestCases	Negative	TV__007	Verify no signal display	Device should be available for testing	1.Perform action for Verify no signal display 2.Observe output	System should behave correctly	Unexpected behavior observed	Fail	Medium
TV TestCases	Negative	TV__008	Verify remote dead battery	Device should be available for testing	1.Perform action for Verify remote dead battery 2.Observe output	System should behave correctly	Unexpected behavior observed	Fail	Medium
TV TestCases	Negative	TV__009	Verify speaker distortion	Device should be available for testing	1.Perform action for Verify speaker distortion 2.Observe output	System should behave correctly	Unexpected behavior observed	Fail	Medium
TV TestCases	Negative	TV__010	Verify screen flickering	Device should be available for testing	1.Perform action for Verify screen flickering 2.Observe output	System should behave correctly	Unexpected behavior observed	Fail	Medium
TV TestCases	Extra	TV__011	Verify WiFi connectivity	Device should be available for testing	1.Perform action for Verify WiFi connectivity 2.Observe output	System should behave correctly	System behaved correctly	Pass	Medium
TV TestCases	Extra	TV__012	Verify smart app installation	Device should be available for testing	1.Perform action for Verify smart app installation 2.Observe output	System should behave correctly	System behaved correctly	Pass	Medium

Module Name	Test Case	Test Case ID	Test Case Description	Precondition	Test Steps	Expected Result	Actual Result	Status	Priority
Pen TestCases	Positive	PEN_001	Verify pen writes smoothly on paper	Device should be available for testing	1.Perform action for Verify pen writes smoothly on paper 2.Observe output	System should behave correctly	System behaved correctly	Pass	High
Pen TestCases	Positive	PEN_002	Verify continuous ink flow	Device should be available for testing	1.Perform action for Verify continuous ink flow 2.Observe output	System should behave correctly	System behaved correctly	Pass	High
Pen TestCases	Positive	PEN_003	Verify cap closes properly	Device should be available for testing	1.Perform action for Verify cap closes properly 2.Observe output	System should behave correctly	System behaved correctly	Pass	High
Pen TestCases	Positive	PEN_004	Verify comfortable grip	Device should be available for testing	1.Perform action for Verify comfortable grip 2.Observe output	System should behave correctly	System behaved correctly	Pass	High
Pen TestCases	Positive	PEN_005	Verify refill replacement	Device should be available for testing	1.Perform action for Verify refill replacement 2.Observe output	System should behave correctly	System behaved correctly	Pass	High
Pen TestCases	Negative	PEN_006	Verify pen without ink	Device should be available for testing	1.Perform action for Verify pen without ink 2.Observe output	System should behave correctly	Unexpected behavior observed	Fail	Medium
Pen TestCases	Negative	PEN_007	Verify broken tip writing	Device should be available for testing	1.Perform action for Verify broken tip writing 2.Observe output	System should behave correctly	Unexpected behavior observed	Fail	Medium
Pen TestCases	Negative	PEN_008	Verify ink leakage issue	Device should be available for testing	1.Perform action for Verify ink leakage issue 2.Observe output	System should behave correctly	Unexpected behavior observed	Fail	Medium
Pen TestCases	Negative	PEN_009	Verify writing on wet paper	Device should be available for testing	1.Perform action for Verify writing on wet paper 2.Observe output	System should behave correctly	Unexpected behavior observed	Fail	Medium
Pen TestCases	Negative	PEN_010	Verify loose pen cap	Device should be available for testing	1.Perform action for Verify loose pen cap 2.Observe output	System should behave correctly	Unexpected behavior observed	Fail	Medium
Pen TestCases	Extra	PEN_011	Verify pen durability after drop	Device should be available for testing	1.Perform action for Verify pen durability after drop 2.Observe output	System should behave correctly	System behaved correctly	Pass	Medium
Pen TestCases	Extra	PEN_012	Verify writing speed performance	Device should be available for testing	1.Perform action for Verify writing speed performance 2.Observe output	System should behave correctly	System behaved correctly	Pass	Medium
